Bayesian modeling of behavior
Project presentations, Dec 14, 2017
Assessment sheet

1. **Understanding**
   a. Did the presenter understand the motivation, the model, and (if applicable) the data?
   b. Did they relate to concepts discussed in class?
   c. Did they answer questions well?
2. **Quality and completeness of results**
   a. Was the math correct?
   b. Did the simulations seem bug-free?
   c. How thorough was the exploration of the model? (not by making it more complex, but by understanding what it does in different situations)
   d. Extra credit: anything beyond the normal scope of a project
3. **Presentation**
   a. Was the presentation well organized?
   b. Was the time limit adhered to (9 minutes)?
   c. Were the equations illustrated by plots where possible
   d. Did you feel lost at any point?
   e. Were there too many slides?
   f. Was every element of every figure explained?
   g. Did any slide contain too much text or too many figures?
   h. Were axis numbers and labels legible and understandable?

Scoring: 1 = poor; 2 = fair; 3 = adequate; 4 = good; 5 = excellent
Final score will be average score plus 5.
